ANNUAL  
BULL SALE  
2023  
MARCH 7

MEDICINE HAT FEEDING COMPANY | 1:00 PM

# Welcome

It is our pleasure to welcome you to our annual bull sale. Each year we work hard to bring our highest quality of herd sire prospects to the sale and this year is no exception. We have always maintained a high standard for our female program and always work to keep our program moving forward, ultimately providing our customers cattle that will go home and work as hard for them as they do for us. As for our herd sire's we have a very uniform group that have a tremendous amount of natural muscling with lots of middle to them which we like to see in our yearling bulls as well.

We are confident that in this year's offering of red and black yearlings there is an animal to fit your operation and needs. We develop these bulls slowly to maximize their longevity. Our bull pen is hand fed 12 lbs of bull ration and free choice of grass hay so they are ready to go to work when you need them. This year the sale will be broadcast on Liveauctions.TV for those that are unable to join us for the sale or who prefer to bid online.

We would like to take this moment to thank all our valued customers that have supported our program over the years. Your friendship and support we are truly thankful for. We welcome you all to come and tour our bulls at the farm before the sale or the bulls will be at Medicine Hat Feeding Company for viewing at noon on Monday March 6th as well as before the sale March 7th.

If you are new to our program and have an interest in the bulls feel free to contact us at any time we would be happy to assist you.

*Don & Lorna Okell*

**Jen Ty**  
**GELBVIEHS**

**ANNUAL BULL SALE**  
**2023**  
**MARCH 7**

MEDICINE HAT FEEDING COMPANY | 1:00 PM

## LUNCH

A complimentary lunch will be served at 11:30 am

## ON-LINE SALE VIEWING

This year you will be able to watch our sale on LiveAuctions.tv

**LiveAuctions.TV**

## PHONE BIDS

If you are unable to attend the sale but wish to make a purchase please feel free to contact our sales team. Auctions and your order will be handled in a professional manner.

## SALE DAY PHONES

Don Okell (403) 793-4549  
Wyatt Stuber (403) 878-9052  
Darren Lutz, Auctioneer (403) 937-2223

## SALE LOCATION

Medicine Hat Feeding Co. | 3381 Gershaw Dr. SW  
Medicine Hat, Alberta  
(403)526 3129 Toll free 1 (800)452-3129

## HOMOZYGOUS DNA RESULTS

At the time of catalog printing the test results for the Homozygous have been completed.

## GUARANTEE

All sale cattle are guaranteed under the terms and conditions of sale as recommended by the Canadian Gelbvieh Association.

## TERMS OF SALE

Are cash or cheque at par, payable to the clerks of the sale on sale day. US funds will be accepted at the rate of exchange. No release will be given until satisfactory settlement has been made. Full payment shall constitute a final sale and then registration papers will be transferred.

## HEALTH

All sale cattle meet the Canadian Health Standards. Foreign buyers are responsible for knowing the current health standards of their country.

## INSURANCE

Western Financial Group 1 (800) 561-1031  
Box 315 2nd Street West, Brooks, AB T1R 1C4

Ownership commences to the purchaser as soon as the animal is sold. Insurance agents will be present sale day to look after your insurance requirements.

We suggest you buy full mortality and fertility insurance for your new bull. A fertile bull can lose the ability to settle cattle therefore, food management of your breeding bulls overall health is very important especially throughout the breeding season. Our warranties do not cover bull injuries or sickness not apparent on sale day.

Although every precaution will be taken to protect the safety and comfort of the buyers neither Medicine Hat Feeding Company or consignors assume any responsibility in these matters and disclaims any liability or otherwise, in the event of an accident or loss of property.

## SHIPPING

Shipping is free within 200km of consignors ranch. Shipment after the sale, no risk is assumed by the seller. All bulls going back to consignors ranch need 100% insurance. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

Craftsman has worked so well for us, we absolutely love him & his offspring. He has done a marvelous job siring his type & stamping his progeny with impressive natural muscling, depth & character. You have to really appreciate his overall body structure & volume. You have to look long & hard to find a bull with that much natural body mass. Disposition is probably one of his most unique traits that we just love about him, he doesn't have a mean bone in his body.

What an impressive moderate framed, herd bull that has so much muscle mass & volume. He is quick to catch your eye. An ET calf we raised, sired by the great SAV Resource 1441Y who has sired many great progeny all over North America & his dam Coleman Donna 2302 who is just a powerhouse in herself. The mating of these two have proven to have built a tremendous, volumous herd bull here with High Roller. He fits our program well with all the right traits he portrays.

GRAND DAM COLEMAN DONNA 2302

Without a doubt one of the most uniquely designed homozygous polled, Balancer Gelbvieh bulls in this year's offering. Great disposition. A true beef bull that offers unmatched shape and expression and muscle mass as well as eye appeal. Just a meat machine. Sired by Jen-Ty High Roller 1HET out of the great SAV Resource 1441Y & Coleman Donna 2302Z as well as one of our top Gelbvieh females Jen-Ty Deeanna 827D. An actual weaning weight of 1000 pounds. Performance standout that will add true value in the form of pay weight on your calves. We are sure he will have lots of friends on sale day, so make sure to check him out.

An early maturing, big growth herd sire prospect has been a stand out right from the beginning. He tops the weaning scale at an actual 868 lbs. Rocketman has developed with extra balance & eye appeal, as well as extra thickness to his hip and body structure. We purchased his dam HDG Miss Enchanted 21E from Hillside Gelbvieh and she has proven herself to fit right into our program. He is going to work well in any program and we predict him to generate high performance feeder cattle.

14.1	0.3	67	94	19	53	8	15.5	-0.23	27	0.5	0.16	-0.06

This homo pld, growthy herd sire prospect comes with that extra length, cherry red with balance and eye appeal. Lots of performance in this guy coming to the weaning pen with an actual weaning weight of 754 lbs and hasn't looked back. Fireball 27F is as long as a freight train and Kanyon portrays that same trait. That extra length and thickness will always add more pounds to your calf crop which in our mind means more \$ in your pocket in the fall.

# UNDERSTANDING EPD'S

## CALVING EASE DIRECT (CE)

Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

## BIRTH WEIGHT (BW)

Predicts the difference, in pounds, for birth weight of the calf.

## WEANING WEIGHT (WW)

Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

## YEARLING WEIGHT (YW)

Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

## MILK (MILK)

The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

## CALVING EASE MATERNAL (CEM)

Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic predisposition to calve unassisted as heifers.

## STAYABILITY (ST)

Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

## YIELD GRADE (YG)

Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

## RIBEYE AREA (REA)

Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

## MARBLING (MB)

Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

## FAT (FAT)

Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.
